

*– Building bridges from drugs to patients –*  
*PORTFOLIO OVERVIEW*

in a

- Founded 2004 in Switzerland
- More than 120 employees (Engineers & Specialists MedTech & Pharma)
- Developer of patch pumps for On/Off body worn use
- Several development projects ongoing with well-known Pharma & Biotech partners →

Two devices are close to market in USA & EU

Innovation Leader  
2015

Nominated

NORDSCHWEIZ

The SenseCore Pump is the vital component in all our solutions

SensePatch  
Small Volume  
Wearable Injector  
(1 - 10ml)

SensePatch  
Large Volume  
Wearable Injector  
(10-20ml)

Senselyo  
Reconstitution Device

SensePen  
Bolus Injector

Motor driven – Dedicated battery – Connectivity – Sensor Technology – Reusable/Disposable concept  
Integrated needle or infusion via infusion set

## Flexibility in Delivery Volume/Size

Small to Large  
1 – 50 ml

## Flexibility in Delivery Profile

Basal (fix or variable rate) and/or Bolus  
(pre-set or adaptable)

No change of primary container needed

Full Flexibility →

- Cartridges
- Standard Vials
- Lyophilized Drugs
- Syringes w Luer

UI with Screen or Buttons & LEDs

Infusion with integrated needle or infusion set

## Further Requirements

### **DOSE ACCURACY**

Highly accurate and predictable delivery starting with the first dose

### **SAFETY**

Safe usage with integrated sensor technology (e.g. Occlusion detection, ...)

Reduced handling steps and increased safety (Automated priming feature, integrated hidden needle etc.)

### **EARLY ON DRUG COMPATIBILITY TESTING**

Test stations are available
