Development Considerations

Growth Drivers

More than 7,000 Medicines in Development Globally

Biopharmaceutical researchers are working on new medicines* for many diseases, including:

CANCERS

CARDIOVASCULAR DISEASE

INFECTIOUS DISEASES 1,261

IMMUNOLOGICAL DISORDERS 1,123

DIABETES 401

MENTAL HEALTH DISORDERS

HIV/AIDS 208

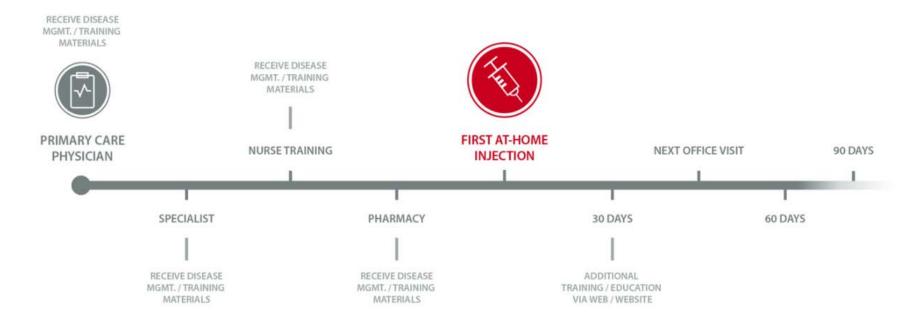

NEUROLOGICAL DISORDERS 1,308

*Defined as single products that are counted exactly once regardless of the number of indications pursued

Collaboration is Key

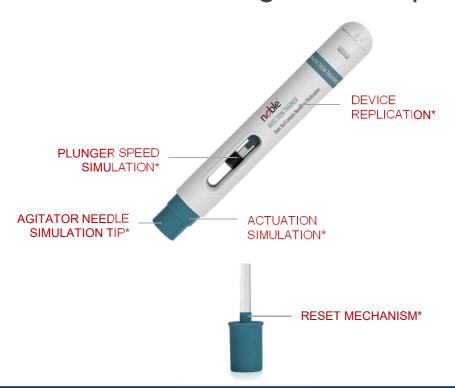

Training Device Development

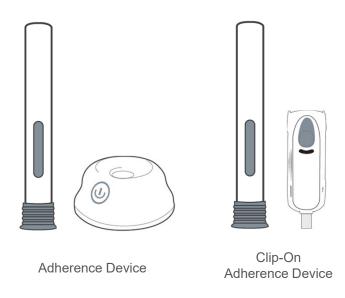

Design, Development & Output

- True to form and function
- Designed to replicate the full user experience
- Platform technologies and enhancements to strengthen retention and recall
- Designed for manufacturability & repeatability
- Does not contain a real needle or liquid

Onboarding -> Adherence

- Interactive feedback during the injection experience
- Detection and prevention of user errors
- Onboard wireless capabilities to connect with adjacent solutions

Bridging onboarding with broader patient experience

"Take care of the patient and everything else will follow"

Thomas Frist, M.D.
