

PROCESS VALIDATION AND REGULATORY STRATEGIES FOR ATMPS

Thursday
Oct 19, 2023

PROCESS VALIDATION:

- Current challenges and solutions of process validation lifecycle for developing and manufacturing cell and gene therapy products
- Case study to provide applicable examples

REGULATORY STRATEGIES:

- Benefits and challenges of speedy drug product development
- Regulatory considerations for early and late-stage drug development, including cell and gene therapies
- Meeting requirements for fast-track development
