TR88 Microbial Data Deviations Investigations

BEHIND THE SCENES

This event is targeted at organizations and individuals concerned with best practices and approaches for microbial data deviations in the pharmaceutical industry based on scientific knowledge and modern testing technologies.

Technical Report Live offers insight into the thoughts and reasoning behind Technical Report 88 and its purpose. Currently, FDA's Guidance for Industry: Investigating Out-of-Specification Test Results for Pharmaceutical Production does not extend to microbial failure investigations.

Spend time with TR 88 authors, industry subject matter experts, and peers to discuss the relevance to this topic, its applications, and its impact.
