

2018 PDA INDIA CHAPTER ADVANCING SCIENCE IN DRUG, DEVICE & PRIMARY PACKAGING: A PRIMER TO CONTAINERS, CLOSURES & INTEGRITY

August 28-29,2018 | WelcomHotel, Vadodara

Container closure performance and integrity are critical for providing robust protection to sensitive drug formulations against a large variety of physicochemical stresses. The system must work together to ensure accurate dosing and delivery to the patient. These attributes must be maintained throughout the product lifecycle, ranging from the manufacturing, storage, and distribution, to use and disposal by end users.

With half a day factory visit and one and a half days the classroom session to address the complexities and challenges to container closure performance and integrity.

LEARNING OBJECTIVES

- Process for assuring packaging quality across the product lifecycle
- Explain defects in glass vials (a) Molded (b) Tubular
- Delamination issues in glass - Possible causes and techniques for mitigation
- Regulatory consideration for packaging lifecycle
- Case study on opportunities in design and quality evaluation of drug delivery and device packaging
- Causes of particulate matter attributed to packaging material and eliminating particulate matter
- Case study on PFS: Optimization of a unit operation for a drug delivery system for complex injectables
- Challenges with selection of closures during development, scale up and full scale manufacturing

WHO SHOULD ATTEND

- Research & Development Team
- Packaging Team
- Technology Transfer Team
- Quality Assurance Team
- Quality Control Team
- Packaging
- Manufacturing Team
- Regulatory Affairs
