

2018 PDA INDIA CHAPTER COLD CHAIN WORKSHOP

April 19-20,2018 | Hilton Airport, Mumbai

As the healthcare industry grows, temperature controlled logistically rapidly evolve along with it. With ever-changing global regulatory requirements, a more diverse array of pharmaceuticals and biopharmaceutical products entering the supply, and new technology emerging daily, companies face the challenge of constantly adapting their supply chain processes to stay ahead of the curve. Responding to the evolution within the industry, this two days interactive session intends to provide insight into the regulatory expectations, challenges and solutions for effective cold chain Management.
