

Deviation Management via Cause & Effect Analysis Webinar

With **Joseph Longworth** – Sr. Engineering Manager at Jubilant HollisterStier LLC

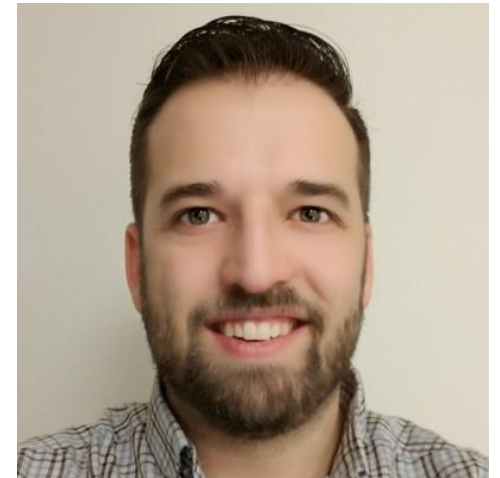

Date & Time: Wednesday June 24, 2020 | 5:00 p.m. PDT

Event Info

From this webinar, you will learn about Jubilant HollisterStier's use of cause and effect analysis to conduct effective, efficient, and sustainable investigations. In addition, Joseph will provide an overview of Causelink® from Sologic and core work processes that make his company's workflow be recognized as the "Best in Class" by regulatory authorities worldwide.

Speaker Bio:

As a leader in the pharmaceutical industry for 8 years, Joseph has held positions in Validation, QA, and Engineering. While in QA, Joseph led 30 Compliance & Oversight team members in preventing deviations via effective shop floor presence and investigations. This team implemented an investigation workflow for deviations which has been recognized as "Best in Class" by regulatory authorities in the USA, European Union, Russia, Japan, Korea, and Brazil. Currently Joseph is the Sr. Engineering Manager at JHS with responsibility for leading Engineering and internal Project Management teams.
