# An Introduction to Visual Inspection

# A hands-on training course

# Overview

This training course covers the fundamentals of visual inspection methods and their application to injectable products. The detection and identification of visible particles is a key part of the course content, though container and closure defects are discussed as well. Students combine classroom review of current regulatory requirements and inspection methods with handson laboratory exercises to develop and practice practical inspection skills. The skills developed through this combination of classroom and laboratory exercises may be applied to manual human inspection, semi-automated and automated machine inspection methods. This is also an excellent opportunity to discuss your specific inspection questions and challenges with expert instructors.

# **Who Should Attend:**

- Injectable Drug Product Manufacturing Professionals and Management
- Quality Professionals and Management
- Validation and Manufacturing Engineers
- Technical Support Staff
- Product Development Scientists
- Inspection Equipment Manufacturers

# **Learning Objectives:**

Upon completion of this course, the attendee will be familiar with:

- Understand current global regulatory and compendial requirements for visual inspection
- Understand patient risk associated with visible particles in injections
- Implement a technically sound and compliant inspection process
- Assess inspection performance

John G. Shabushnig, PhD, Principal Consultant, Insight Pharma Consulting, LLC

John Shabushnig is the founder of Insight Pharma Consulting, providing expert guidance in all aspects of visual inspection. He has over 30 years of industry experience starting as a Research Scientist at The Upjohn Company and most recently as a member of Pfizer's Global Quality Operations, where he was responsible for providing microbiology and aseptic manufacturing technical support. John holds a B.S. in Chemistry from Carroll College and a Ph.D. in Analytical Chemistry from Indiana University. He is an active member of the Parenteral Drug Association (PDA), having served on the Board of Directors (2003-2011) and as Chair (2008-2009) and is the founder and leader of the Visual Inspection Interest Group. He

serves on the United States Pharmacopeia (USP) Dosage Forms Expert Committee and chairs the Visual Inspection of Parenterals Expert Panel. He has published and presented numerous papers on the subjects of spectroscopic analysis, process analytical technology (PAT), rapid microbiological test methods and the visual inspection of pharmaceutical products.

# Wednesday, 11 April 2018

# 9:00 - 18:00

#### 9:00 Welcome and Introduction

- Why We Inspect
- Patient Safety
- Regulatory Requirements
- Compendial Requirements

#### 10:30 Coffee Break

# 11:00 Inspection Methods and Technologies

- Critical Parameters (lighting, time, contrast and motion)
- Manual Visual Inspection (MVI)
- Semi-Automated Visual Inspection (SAVI)
- Automated Visual Inspection (AVI)

# 12:30 Lunch Break

#### 13:30 Particle Identification

# 14:30 Laboratory Exercise: Manual Visual Inspection

- Light Measurement
- Assessment effect of changing critical variables
  - Time (10 sec vs. 20 sec)
  - Lighting (2,500 lux vs. 1,250 lux)
  - Motion/Agitation (with vs. without)

# 15:30 Coffee Break

# 16:00 Continue Laboratory Exercise

## 17:30 Wrap-up Discussion / Q&A

# 18:00 End of Day 1

# Thursday, 12 April 2018

9:00 - 16:30

# 9:00 Inspection Data Review

• From previous day's laboratory exercise

# 10:00 Defect Classification Strategies

- Risk classification definitions
- Critical, Major and Minor defects

#### 10:30 Coffee Break

# 11:00 Acceptance Sampling

- Sampling Plan Variables
  - Sample Size
  - AQL and UQL
- · Common Standards
  - ANSI/ASQ Z1.4
  - ISO 2859

# 12:00 Inspector Selection and Qualification

- · Vision Screening
- Initial Training
- Initial Qualification
- Regualification

## 12:30 Lunch Break

# 13:30 Inspection Strategies

- Reinspection
- 2-Stage Inspection
- Focused inspection
- Empty Vial Inspection

# 14:00 Inspection Validation

- Inspection performance Assessment
  - Knapp Method
- Acceptance Criteria

# 14:30 Coffee Break

# 15:00 Mythbusting

• Common misperceptions in visual inspection

# 15:30 Wrap-up Discussion / Q&A

# 16:30 End of Training Course

Markus Lankers, PhD, Managing Director, rap.ID GmbH

Markus Lankers is one of the co-founders of rap.ID Particle Systems GmbH, a company that develops, manufactures and sells rapid particle identification systems. Within rap.ID Markus is responsible for research and development of specific characterization method of particulate analysis and manages two dedicated particle characterization service labs in Germany and the US. Prior to this position, he worked as scientist in different development departments with Schering AG, Berlin, Germany. He publishes and presents work in the field of particle characterization and spectroscopic analysis. As an active member of the PDA, he has helped establish the PDA Visual Inspection Interest Group in Europe

and set up the first company-independent Visual Inspection Trainings Course. He has served as program co-chair for the PDA Visual Inspection Forum in Europe and the USA.
